## PROFILE

Motivated and detail-oriented MBA Finance graduate with a specialization in FinTech, passionate about financial analysis, forecasting, and data-driven decision-making. Seeking a challenging role as a Financial Analyst to leverage my skills in financial modeling, Excel, and data visualization to support business growth and strategic planning.

## WORK EXPERIENCE

Tax Advisory Intern

Grant Thornton India LLP | 2 Months

- Analyzed client financial data for taxation and compliance
- Supported preparation of tax audit reports and documentation
- Created Python-based automation for tax data classification
- Applied financial ratios to assess business health during tax planning

## PROJECTS

### Power BI Sales Dashboard

- Created an interactive dashboard using dummy data
- Visualized sales by region, product category, and monthly trends
- Used slicers and KPIs to enhance executive decision-making

### Financial Literacy Awareness Campaign

- Conducted a session for school students on personal finance basics (budgeting, savings)
- Designed activities, visuals, and simplified financial terms for better engagement
- Received appreciation for effective delivery and time-bound execution

### Financial Statement Analysis of Hindustan Unilever Ltd.

- Analyzed 5 years of HUL's financial statements using Excel
- Evaluated profitability, liquidity, and solvency using ratio analysis
- Summarized key findings and trends in a formal report presented to faculty

### Cost Optimization Case Study using Excel

- Analyzed expense breakdown of a manufacturing company to identify cost leakages
- Proposed a 12% cost-saving plan through optimization of fixed and variable costs
- Created charts and dashboards in Excel to communicate key metrics

## ACHIEVEMENTS

- Delivered a Financial Literacy Session to 10th-grade students
- Appreciation Letter from School Principal
- 3.8 CPE Credits in Robotic Process Automation
- 1.4 CPE Credits in Generative AI for Finance
