**Table Tennis**  
**Cricket**  
**Surfing Internet**

## PROJECT WORK

### Super Store Sales Dashboard

- Created an interactive dashboard on Power BI to track, analyze, and forecasts sales for a retail super store.
- Utilized time series analysis and data visualization techniques to deliver actionable insights.
- Develop KPIs, sales trends, and regional performance summaries for strategic decision making.

### HR Analytic Dashboard

- Develop a dynamic HR Analytics dashboard on Power BI to monitor key HR metrics such as attrition rate, average salary, average age, and employee distribution by job role and salary slab.
- Applied data transformation techniques in Power Bi and created interactive visualizations using bar charts, pie charts, and line graphs.
- Improved HR reporting efficiency by consolidating complex data into a single, easy to read dashboard.

## RESEARCH PROJECT

### Impact of E-learning on Student Career Building

- Conducted in-depth research study analyzing how e-learning influences students' career development.
- Designed and distributed a structured questionnaire to collect primary data.
- Performed statistical analysis using regression to determine the relationship between e-learning and career development.
