## EXPERIENCE

### Frontend Developer Intern | LetsGrowMore (Feb 2023 - Mar 2023)

- **Responsive Web Design:** Developed 3+ fully responsive websites using HTML, CSS, and JavaScript, ensuring compatibility across all devices and platforms.
- **Feature Enhancement:** Designed and implemented custom graphic sets and user-friendly interfaces, contributing to a 20% increase in website traffic.
- **API Integration:** Utilized various APIs to enhance website functionality, creating dynamic and interactive web pages.
- **Collaboration:** Worked closely with cross-functional teams to understand project requirements and deliver high-quality, user-centric web solutions.

---

## PROJECTS

### ❖ SentimentIQ Web App

- **Overview:** Developed a dynamic Sentiment Analysis portal using HTML, CSS, and JavaScript.
- **Functionality:** Designed an intuitive user interface that analyzes and visualizes user sentiment, potentially useful as a business tool for behavioural and sentimental analysis in interview processes.
- **Impact:** Laid the foundation for a scalable business model that companies can integrate into their hiring processes to better understand candidate sentiment.

### ❖ TuneSync Music Platform

- **Overview:** Crafted a dynamic music streaming application using HTML, CSS, and JavaScript.
- **Features:** Designed a user-friendly interface with extensive song libraries and customizable playlists.
- **User Experience:** Focused on providing an immersive and intuitive experience, showcasing proficiency in frontend development through a polished and interactive music platform.
