Address: - New Delhi, 110025| Contact no.: +91-8318989303

EDUCATION

BTech | Aligarh Muslim University – Aligarh

2019-2023

Electronics Engineering | CPI – 7.6/10

EXPERIENCE

Research Analyst | GlobalLogic

12/2024 - Present

- Conduct research and fetch data to support business strategy and decision-making.
- Analyze fetched data to get useful insights.
- Assisting in basic data analysis and generating reports.

Data Analyst | SK Industries

08/2023 - 03/2024

- Extracted, cleaned, and analyzed large datasets using SQL to generate actionable insights, ensuring data accuracy and quality.
- Fetched the data from unstructured data and created Power BI dashboard to visualize KPIs.

Data Analyst Intern | Psyliq

11/2023 - 12/2023

- Examined in-depth analysis of Diabetes Prediction Data, HR Data Analysis, Employee Data Analysis.
- Analyzed complex data sets using SQL queries and transformed raw information into actionable insights.
- Developed skills in real-world applications of SQL, gained experience in tools such as Advanced Excel, Power BI.

PROJECTS

Analysed E-Commerce Sales Data in Power BI

- Developed an interactive Power BI dashboard for real-time online sales data tracking and in-depth analysis.
- Utilized parameters to efficiently drill down in worksheets and customized the filters for optimal data visualizations.
- Established connections, joined new tables, and performed calculations to manipulate data for enhanced visualizations.

Blood Bank Management System

- Created a highly efficient Blood Bank Management System to streamline the supply and distribution of blood products.
- Implemented the use of SQLite 3 as the database system for storing and managing critical data.
- Utilized the Python Programming Language to develop the system and ensure seamless functionality.

SKILL-SET

- Expert in SQL with the ability to write advanced database queries and conducting data analysis and interpreting results.
- Proficient in Python, C, C++; familiarity with Data Cleaning, Data Modelling, Data Analytics, NLP.
- Good understanding with Data Structure and Algorithms, OOPs Concept.
- Experience with analytical tools such as Jupyter, Google Colab, Advanced Excel, Power BI, GitHub.

EXTRA-CURRICULAR CERTIFICATION

Data Science and Artificial Intelligence | AlmaBetter

04/2024 – 09/2024

- Completed an intensive 6-month program covering Python programming, SQL, machine learning, statistics, and data visualization with tools like Tableau and Power BI.
- Worked on real-world projects, including building predictive models, analyzing datasets, and creating dashboards.
- Gained proficiency in end-to-end data science workflows, preparing for industry roles.

COURSES AND CERTIFICATION

- Advanced Data Analytics | [Google](#)
- SQL for Data Analytics | [Udemy](#)
