Projects

SQL

Analysis of cell phones sales and transactions:

- Analyzed cell phone sales trends, customer behavior, and manufacturer performance across different regions and time periods.
- Identified top-selling manufacturers, high-value customers, and price variations by model.
- Evaluated transaction volumes per zip code, sales growth, and market share shifts.
- **Tools & Techniques:** SQL (Joins, Aggregations, Window Functions, CTEs, Ranking Functions)

Try to understand the customer behavior:

- Extracted insights from retail transactions to analyze customer purchasing behavior.
- Identified best-selling products, high-value customers, and top manufacturers.
- Tracked year-over-year sales performance and market trends.
- **Tools & Techniques:** SQL (Joins, CTEs, Aggregations, Ranking Functions)

POWER BI

E-commerce Sales Analysis

- Developed interactive dashboards to analyze customer behavior, pricing trends, and sales performance.
- Tracked product sales by category, brand, and time to identify demand fluctuations.
- Assessed the impact of special promotions on revenue and customer engagement.
- Analyzed search behavior, brand preferences, and high-level sales metrics.

Tools & Techniques: Power BI, DAX, Data Cleaning, Data Visualization

PYTHON

Mini Project - Bank User Signup, Login, and Credit Card Eligibility.

- Developed a banking system that allows users to sign up, log in, and check credit card eligibility.
- Implemented password and PAN card validation for secure authentication.
- Categorized users into Silver, Gold, and Platinum cards based on income criteria.
- **Tools & Techniques:** Python (Pandas, NumPy, Conditional Logic)

Retail Case Study

- Merged customer, product, and transaction data to track purchases and customer behavior.
- Analyzed city-wise customer distribution, store-wise sales performance, and high-value transactions.
- Derived insights on top customer segments and spending patterns, particularly in Electronics and Clothing.
- **Tools & Techniques:** Python (Pandas, Matplotlib, Seaborn)
