PROJECTS

Bank Fraud Detection Dashboard:

³ [View Project on LinkedIn](#)

- Financial institutions use Power BI to quickly identify and prevent fraud.
- Advanced analytics algorithms are used to display fraud patterns on the dashboard.
- This leads to improved customer trust, decreased financial losses, and increased efficiency.

Advanced Excel Project – Sales Analysis for Fashion Retail (Women's Kurtas):

³ [View Project on LinkedIn](#)

- Used conditional formatting, lookup functions, and pivot tables to examine sales performance across various product categories.
- Determined seasonal patterns, best-selling items, and underperforming SKUs to support inventory optimization.
- Created interactive dashboards to showcase regional performance, customer preferences, and sales trends.
- Provided useful insights that enhanced stock planning efficiency and supported data-driven marketing efforts.
