PROJECTS UNDERTAKEN			
Research Projects	Researched the <b>Role of Forecasting and Modeling in Finance</b> , focusing on their applications in risk management, investment strategies, and policymaking. Analyzed the use of time series analysis for predicting macroeconomic indicators, explored credit risk management models, and examined the impact of AI and big data in real-time financial services like high-frequency trading and robo-advisors. Highlighted how these tools enhance financial stability in a constantly evolving economic environment.		
	Conducted research on the <b>Role of AI in Sustainable Finance</b> , focusing on how AI tools, such as data analysis and risk assessment, enhance environmental and social sustainability in financial practices. Explored the importance of ethical considerations and regulatory frameworks in ensuring responsible AI implementation within the financial sector.		
Academic Projects	<b>Johns Hopkins University, Baltimore, USA</b> Participated in the Hopkins Engineering Exploratory Program (HEEP), gaining insights into cuttingedge research, engineering disciplines, and advanced technologies. Engaged with faculty and students, enhancing my understanding of engineering education and future academic goals.
