WORK EXPERIENCE

Ace Software Solutions India Pvt. Ltd.

Team Leader (Apr 2022 - Present)

System Administrator (Aug 2019 - Apr 2022)

- Managed 24x7 enterprise on-premise datacenter and remote US and UK datacenters' high availability, performance, and disaster recovery capability.
- Managed network security architecture and endpoint security with FortiGate Firewalls and FortiEMS.
- Administered and monitored enterprise-level physical server infrastructure (Dell iDRAC, HP iLO), with hardware lifecycle optimization.
- Managing a virtualization infrastructure with VMware vSphere (ESXi, vCenter) that hosts over 2,000 VMs, while ensuring uptime, host utilization, and optimal performance of the VMs.
- Managed configuration, optimization, and performance tuning of SAN switches, enterprise SAN storage, and NAS appliances for business-critical data access.
- Led a team of five system administrators to provide Tier 1, 2, and 3 support, proactive server monitoring, and exceptional IT services to over 300 end-users across various locations.
- Good hands on with ITIL-aligned Change Management, Risk Management, and Incident Management processes, utilizing JIRA for workflow automation and ticketing.
- Provided weekly SLA dashboards and monthly operational performance reports to executive stakeholders, ensuring transparency and ongoing improvement.
- Enforced a monthly patch management lifecycle for servers and endpoints, enhancing security compliance posture and audit readiness.
- Managed enterprise AV and endpoint protection platforms, protecting infrastructure from malware, ransomware, and insider threats.
- Configured and deployed Endpoint Data Loss Prevention (DLP) policies through Microsoft Intune and Mobile Device Management (MDM) to secure data for BYOD as well as corporate devices.
- Operated SharePoint Online environment for company intranet solutions, including managing permissions through Azure Security Groups.
- Managed Microsoft 365 services such as Exchange Online, Teams, OneDrive, SharePoint, Entra ID (Azure AD) for OAuth/SAML integrations, and recently added AI tools such as Copilot and Copilot Studio.
- Coordinated ISO 27001:2022 evidence preparation, preparing weekly, monthly, quarterly, and yearly compliance reports for audits and certifications.
- Led capacity management projects, forecasting resource requirements and planning IT growth to match organizational growth plans.
- Created and controlled yearly IT budgets, ensuring cost-effectiveness and projecting resource expenditures.
- Served as the last point of escalation for high-priority issues, resolving high-severity incidents and maintaining service continuity.
- Managed team appraisals, individual development plans, and crafted training programs for technical staff upskilling.
- Developed team-building culture, enhanced retention, collaboration, and cross-functional IT operations effectiveness.
- Collaborated with business units to learn about new requirements, created end-to-end technology architectures, and effectively delivered solutions.
- Performed Proof-of-Concept (POC) assessments for future technologies, ensuring informed IT investment decisions.
