About Me

Integration Solution Architect with over 12 years of expertise in implementing cutting edge integration solutions. Proficient in a diverse range of technologies including MuleSoft, IBM WebSphere Message Broker, IBM Integration Bus, IBM App Connect Enterprise. Adept at leveraging Message Queue and Cloud technologies like Azure to design and develop robust applications. Skilled in architecting and delivering scalable integration projects that drive business efficiency and technological innovation..

- Architecting and developing robust APIs, ensuring scalability and security
- Managing full integration lifecycle, from design conceptualization to production deployment
- Crafting efficient DWL and ESQL code for diverse node configurations
- Creating and optimizing Schemas, Message Maps, and DFDL for various message types
- Expertly handling multiple data formats including XML, JSON, Fixed Format, and CSV
- Producing comprehensive design documents and ESB deployment packages adhering to organizational standards
- Leveraging cloud technologies like Azure alongside integration platforms such as MuleSoft, IBM WebSphere Message Broker, IBM Integration Bus, and IBM App Connect Enterprise

Educational Qualifications

- | | |
|-----------|---|
| 2007-2010 | Bachelor of Engineering (B.E)
Park College of Engineering and Technology, Coimbatore, India |
| 2004-2007 | Diploma in Electronics and Comm. (DECE)
Thiagarajar Polytechnic College, Salem, India |

Certifications

**MuleSoft Certified Developer
Level 1 (Mule 4)**

**IBM Certified Solution Developer
Integration Bus v10.0**

Skills

- Mule4, RAML, Munit
- IBM ACE, IIB, WMB, WMQ
- Azure Function App
- Azure Event Hub
- Cloudhub, API Manager
- API Security
- MySQL, DB2, Oracle
- Bitbucket CI/CD
- Fiserv, Sybase
- Load Testing
- SVN, TFS, Git, Bitbucket
- Java/J2EE
- node.js

Work Experience

2023-Present **Integration Consultant | NBH Bank (Freelance - Independent Consultant)**

- | | |
|-----------|---|
| 2.0 years | <ul style="list-style-type: none">• Lead a team in architecting and implementing critical cloud-based integrations, leveraging Azure and IBM App Connect Enterprise (ACE) technologies.• Design and deploy Azure Function Apps and Event Hubs, orchestrating seamless data flows across diverse banking systems.• Develop ACE integration flows incorporating Kafka nodes, enhancing real-time data processing capabilities.• Manage bill payment-related projects, ensuring compliance with financial industry standards and regulations.• Collaborate with vendors and business stakeholders to implement robust solutions for handling Personally Identifiable Information (PII) and sensitive data, both internally and in vendor interactions.• Drive architectural decisions to optimize system performance, security, and scalability in a highly regulated banking environment.• Mentor team members, fostering technical growth and promoting best practices in integration development. |

2021–2023

Associate Solution Architect | Apisero (NTTDATA)

2.6 years

- Architected and executed integration projects using MuleSoft, connecting major systems including Salesforce, SAP, and Fiserv
- Implemented AWS cloud-based services, including Amazon SQS and S3, enhancing system scalability and performance
- Developed architectural designs and solutions, with a focus on cloud platforms and API security best practices
- Collaborated with client business teams and vendors to gather requirements and conduct design architecture reviews
- Created and maintained formal documentation, translating complex technical concepts into clear, actionable plans
- Designed and implemented integration solutions, resolving design, test, and data issues while developing proof-of-concepts (POCs)

Clientele :

Flexcare - USA (Offshore) - Healthcare Staffing
Service Credit Union - USA (Offshore) - Banking
Discount Tire - USA (Offshore) - Retail

2013–2021

Integration Consultant | Gramener IT Services

7.9 years

- Progressed from application developer to integration expert, mastering IBM middleware systems and cloud-based API management solutions
- Designed and implemented complex integration projects for banking sector, including critical ATM-related integrations and middleware solutions
- Developed complex integration solutions, ensuring seamless data flow across diverse enterprise and legacy systems
- Mentored junior teams and collaborated with cross-functional stakeholders to align integration strategies with business objectives
- Continuously expanded expertise in integration technologies, adapting to industry trends and driving digital transformation initiatives in both domestic and international banking contexts

Clientele :

South Jersey Industries - USA (Offshore) - Energy and Utilities
Sirius Computer Solutions - USA (Offshore) - IT
AbuDhabi Islamic Bank - UAE (Onshore) - Banking
Pitney Bowes Inc - USA (Offshore) - Retail

2011–2013

Software Developer | Gnanaguru Technologies

1.4 years

- Designed, developed, and maintained custom web applications from concept to deployment
 - Implemented diverse programming languages and frameworks to deliver scalable, user-centric solutions
 - Collaborated with cross-functional teams to align applications with business objectives
-
