Associate Software Development Engineer

Bridgenext Technology

⌚ 08/2022 - 03/2024 🗺 Pune, Maharashtra

Passionate coder committed to pushing boundaries and delivering excellence.

- Comfortable in JavaScript, brilliant at developing maintainable, scalable web application code.
- Extensive experience in database management with MySQL, ensuring efficient data storage and retrieval.
- Proficient with React.js to create interactive user interfaces for backend development with Node.js.

INTERNSHIP

ADROIT IT CONSULTING LIMITED

Universal Informatics

PROFESSIONAL PROJECTS

Teleshopping CRM (ASP.NET Core/MVC, SQL Server, Stored Procedure)

- Developed and optimized a CRM system to manage leads, customers, orders, and aftersales service.
- Improved database performance by optimizing stored procedures and queries, enabling realtime updates.
- Integrated third-party APIs for SMS, WhatsApp messaging

Astroscience (Multi-Source Lead Fetching in CRM)

- Developed functionality to fetch and manage leads from Google and Meta platforms into the CRM system, ensuring accurate tracking from multiple campaigns and ad sources.
- Differentiated leads based on platform (Google, Meta) and source (Instagram, Facebook) to streamline reporting and lead management
- Integrated third-party APIs, including Facebook APIs, to automate lead fetching and processing workflows
- Designed and implemented a user-friendly UI to search, filter, and manage leads efficiently within the CRM

SKILLS

ASP.NET Core **ASP.NET MVC**

RESTful APIs **C#** **C/C++** **Mysql**

Third-Party API Integration **Reactjs**

HTML **CSS** **Java Script**

Entity Framework **Teamwork**

Database Optimization

Problem Solving **Time Management**
