Email ID: vallam1122@gmail.com **Mobile Number:** +8688433458

PROFESSIONAL SUMMARY:

- Overall 7 years of IT Experience in analysis, design, development and implementation of Web services, Web applications, Mule ESB, Cloud Hub and Anypoint Platform
- Proficient Experience of working with Mule ESB integration platform using Anypoint Studio, Anypoint Platform
- Experience in designing and integrating applications using Mule ESB which can interact irrespective of technology like SAP, JMS, Web Service, FTP and HTTP/S etc.
- Experience in various Service mediation, Message Routing and data transformation techniques in mule
- Experience and understanding of Web Services (Both REST and SOAP)
- Experience in Restful API Development using RAML
- Hands-on experience in Deployment of the applications in Cloud Hub
- Had Knowledge in Mule application testing using MUnit framework
- Experience in GitHub, Jenkins and deployment tools
- Experience in ELK and Grafana dashboards
- Worked on Continuous Integration and Maven
- Good database experience with My SQL and Redis Cache
- Experience on XML, Schemas, JSON
- Good knowledge and experience in MS-Office and Excel
- Experience on Web Application development using Ionic
- Working on Agile methodology

- Ability to work with a team and have passion for delivering

WORK EXPERIENCE:

- **Current Organization:** Quant NXT Private Limited as Associate Consultant in from September 2022 to October 2025.
Previous Organization: Densy's Consulting Private Limited as Associate Consultant in from April 2018 to August 2022.

TECHNICAL EXPERIENCE:

- ESB Technologies : Mule ESB, Anypoint Studio, RAML, knowledge on MMC, Cloud Hub
- Operating System : Windows and Linux
- Web Servers : Apache Tomcat
Web Services : SOAP, REST
- Database : MySQL, SQL Server
- Testing & Logging tools : MUnit, Postman, SoapUI & JIRA
- Source Control Systems : Bit Bucket , Git , Git Lab , SourceTree
- Continuous Integration : Jenkins and open shift container platform

CERTIFICATIONS:

- **“Mule Soft Certified Developer – Level 1 (Mule 4)”**

PROJECTS:

:

Project 1

- Client : Infosys
- Project : DIRECTV
- Tools : Anypoint Studio, Anypoint Platform, JIRA, Maven, GitHub, Jenkins, CloudHub
- Project Duration : September 2022 – October 2025 ➤ ➤ Role : MuleSoft Developer

Description:

- DirecTV (trademarked as DIRECTV) is an American multichannel video programming distributor based in El Segundo, California. Originally launched on June 17, 1994, its primary service is a digital satellite service

Serving the United States. Its primary competitors are Dish Network, traditional cable television providers, IPbased television services, and other over-the-top video services.

Responsibilities:

- Get the requirement from client and design the interface and implement it.
Implementing High level design and Low-level design documentations for interfaces based on client requirement.
- Consuming and Exposing Web services (**RESTFUL** APIs) by using RAML.
- Using various mule connectors like Https, SAP.
- Data Weave transformations for simple and complex XML and JSON.
- Creating RAML files for exposing REST services.
- Prepared Test cases and Testing application using MUnit.
- Implementing Error Handling using different exceptional strategies.
- Deploying the application through GitHub, Jenkins in CloudHub.
- Involving in fixing the defects raised by DEV, TEST and UAT Teams.

Project: 2

- Project : Cuba Health Services
- Tools : Anypoint Studio, Anypoint Platform, JIRA, Maven, GitHub, Jenkins, CloudHub
- Project Duration : July 2021 – August 2022
- Role : MuleSoft Developer

Description:

The Purpose of this project is to provide comprehensive and complete solution to the Hospital Management. This Project includes Help Desk, Registration, Outpatient, and Inpatient, services, Laboratory, Pharmacy, Employee information and Billing modules. Help Desk provides information regarding to the doctor appointments, Services module provides info about available services. Laboratory provides status of tests, updated pharmacy info is maintained in pharmacy module, and Employee's information and their salary details are maintained in payroll. There is a search within the existing records based on several criteria like patient's ID, first name, last name and date.

Responsibilities:

- Involved analysis, design, development, phases of Application. Implementing the project in Agile methodologies – sprint &
- Created Mule ESB artifact and configured the Mule configuration files and deployed in Cloud-hub Environment
- Strong experience on various Mule connectors / adapters, developing API, API management And developing services on Cloud
- Experience in MuleSoft Anypoint API platform on designing and implementing Mule
- Utilized integration technologies such as HTTP, XML, MYSQL, REST Web Services and APIs to Develop the customer
- Extensively used Mule Connectors that include File, SMTP, FTP, SFTP, SAP, IBMBQ, and JMS Choice Router Connector.

Strong knowledge and hands on experience in documenting and designing RESTful API's as Per RAML specification.
- Developed RESTful web services in Mule ESB based on SOA architecture.
- Working knowledge of API management using Anypoint API management tools.
- Utilized custom logging framework for Mule ESB
- Experience to deploy the application in Standalone Deployment.

Project: 3

Project: HOPES (Hospital-e Solution System)

Role: DBA

Responsibilities:

- Installation, configuration and maintenance of MS SQL Server 2005/2008.
- Creating users and implementing to the permissions to the users.
- Performing the database up gradations from lower version to higher versions and database refreshes from production to development.
- Monitoring disk space, monitoring performance ➤ ➤
- ➤ Using both System Monitor and Profiler.
- Backing and Restoring of Databases.

- Maintained Database Authentication modes, Creation of user, Configuring permissions and Assigning roles to users.

Monitoring database growth, managing Databases, data files, log files.

- Backup restore database, managing servers, managing clients, automating administration Tasks.
