- Node JS, MongoDB, Express JS, Rest APIs, MongoDB Compass
- HTML, CSS, JavaScript
- Git, Git Actions,

PROFESSIONAL EXPERIENCE

Senior Software Engineer 06/2025 – Present
Techhand Innovation Private Limited Gurgaon

Senior Software Engineer 11/2022 – 06/2025
Kadel Labs Pvt Ltd Jaipur

At Kadel Labs, I excel both autonomously and collaboratively, prioritizing code integrity and innovation. Proficient in React.js, Node.js, and finance AI tools like ChatGPT, I'm spearheading the transformation of web applications to mobile platforms using React Native. Adaptable to high-pressure environments and tight deadlines.

Full stack Engineer 03/2022 – 10/2022
Clouwood Pvt Ltd Noida

I lead requirement gathering and architectural design for comprehensive product development, guiding the entire web development lifecycle. Proficient in React.js, Node.js, and MongoDB, I oversee application development, ensuring seamless execution from conception to delivery.

Full Stack Engineer 02/2021 – 03/2022
Nimble App Genie Jaipur

As a developer for a UAE-based e-learning site, I enhanced and developed features using ReactJS, JavaScript, HTML, and CSS. Managed project documentation and provided clerical support for routine and special tasks, ensuring smooth project operations and client satisfaction.

PROJECTS

AI Chatbot with Customer Support & Admin Panel

A virtual assistant enabling users to interact via chat for banking services, with escalation to human agents and admin controls for support.

- **Responsibilities:**
- Created user and admin interfaces with React.js and Tailwind CSS.
- Integrated OpenAI and Deepgram for natural language understanding and speech-to-text features.
- Managed backend logic and support ticketing with Flask and PostgreSQL.
- Implemented real-time communication using WebSocket and role-based access.
- **Technologies Used:** React.js, Tailwind CSS, Flask, OpenAI, Deepgram, PostgreSQL, WebSocket, JWT

Investment Platform with Admin Panel

A web application enabling companies to register, upload documents, and list investment opportunities while users can browse, verify, and invest. Includes an admin panel for managing companies, documents, and users.

- **Responsibilities:**
- Developed responsive UI with React.js, Redux, and Material-UI.

- Built RESTful backend with Node.js and Express.js, including JWT-based authentication.
- Integrated MongoDB for storing company, user, and investment data.
- Enabled AWS deployment and implemented Git for version control.
- **Technologies Used:** React.js, Redux, Material-UI, Node.js, Express.js, MongoDB, JWT, AWS, Git

Project Management Tool (Jira-like)

A collaborative platform for managing team projects and tasks, mimicking Jira features such as ticket tracking and RBAC.

- **Responsibilities:**
- Built ticket management interface using React.js, Redux, and Ant Design.
- Developed backend services with Node.js and MySQL for task assignment, updates, and progress tracking.
- Implemented role-based access, user authentication, and real-time updates using Socket.IO [↗](#).
- **Technologies Used:** React.js, Redux, Ant Design, Node.js, Express.js, MySQL, Socket.IO [↗](#), JWT, Git

Learning Management System (LMS)

A multi-role educational portal for students, teachers, and colleges supporting content uploads, progress tracking, and live sessions.

- **Responsibilities:**
- Built a modular frontend using React.js and Bootstrap.
- Developed APIs in Node.js to manage user data, course content, and progress.
- Integrated PostgreSQL for structured data and WebRTC for live class functionality.
- Implemented notification and calendar systems for class scheduling.
- **Technologies Used:** React.js, Bootstrap, Node.js, PostgreSQL, MongoDB, WebRTC, Git

EDUCATION

Btech <i>Global College of Technology(Jaipur)</i>	07/2014 – 07/2018
12th CBSE	07/2013 – 07/2014
10th RBSE	07/2011 – 07/2012
