Hotel Udai Median — Website

In this project I develop & design this website using WordPress.

Via-Lakhela Website

In this project I develop & design this website using wordpress.

DPS School – CodeIgniter CMS

Developed a custom Content Management System (CMS) and dynamic school website for DPS School using the CodeIgniter PHP framework. Key features and contributions:

Admin Panel Development:

Designed and implemented a robust admin dashboard to manage:

Dynamic web pages, Home page content, Banners and image albums, Event and notice sections.

Website Frontend: Built a responsive, user-friendly frontend connected with CMS-managed content, ensuring real-time updates.

External API Integration:

Integrated third-party APIs calendar.

This project showcases strong skills in MVC architecture, modular coding practices, and web application development using CodeIgniter.
