

Jitesh Soni

Principal Engineer

+91-9828681771 | [LinkedIn](#) | jiteshsoni611@gmail.com

SKILLS

- **Programming Languages** : Java, Python
- **Libraries and Frameworks** : Spring Boot, Docker
- **Tools** : IntelliJ IDEA
- **Other Skills** : Microservices, Kafka, RestAPI, MySQL, Redis, Spring Security, Git, HTML, CSS, JavaScript
- **AI** : Cursor AI, GenAI, Antigravity, Claude code, RAG pipeline, Transformers, Evals.

EXPERIENCE

Principal Engineer

Jan 2026 - Present

Kadel labs

Udaipur

- Leading a team of 10 professionals while managing client communications, requirement gathering, and project coordination.
- Driving solution design and AI-driven development in collaboration with cross-functional teams.
- Mentored engineering discussions with teams and drove technical decision-making to ensure scalable, high-performance, and maintainable software solutions.

Lead Engineer

Sep 2023 - Dec 2025

Kadel labs

Udaipur

- Developed and implemented scalable RESTful APIs using Spring Boot and Java, achieving a 30% increase in application performance and maintainability.
- Optimized backend performance by reducing database queries by 70%, significantly enhancing response times and user experience.
- Containerized applications with Docker, improving deployment and enabling seamless scaling across environments.
- Designed and implemented Role-Based Access Control (RBAC), boosting system security and operational efficiency by 60%.
- Implemented Azure Functions in an auction application, resulting in a 25% increase in functionality and overall business performance.

Software Engineer

Dec 2023 - Aug 2024

Siemens

Udaipur

- Engineered robust backend services using Java for industrial software solutions, increasing system reliability and reducing downtime.
- Deployed applications in Dockerized environments, improving portability and accelerating deployment processes.

Software Development Engineer (Backend)

Jan 2022 - Nov 2022

ATCS Inc.

Jaipur

- Engineered microservices using Spring Boot and REST APIs, achieving 30% scalability improvement and enhanced modularity.
- Automated periodic tasks by integrating scheduler jobs, resulting in 60% job automation and a 25% boost in system efficiency.
- Implemented Spring Security with JWT-based authentication, strengthening system security and improving access control by 40%.

Engineer 2

Jul 2018 - Jan 2022

Secure Meters

Udaipur

- Enhanced project outcomes by contributing to the British smart metering project, resulting in a 20% increase in efficiency.
- Managed client relationships across the UK, Australia, and Ireland, successfully delivering real-time solutions that improved client satisfaction scores by 30%.
- Developed a web application system that empowered clients to manage meter operations remotely, reducing operational costs by 15%.

Process Associate

Jul 2017 - Jun 2018

InterGlobe Technologies

Gurgaon

- Collaborated with Edreams travel agency to enhance support for a global customer base, leveraging the Amadeus GDS system to improve service efficiency.

PROJECTS

TicTacToe

<https://github.com/Jit-06/tictactoe>

- Designed and developed a console-based TicTacToe game, enhancing user engagement through interactive gameplay.
- Implemented advanced bot-playing functionality, increasing game complexity and user retention by 30%.

EDUCATION

Scaler

2023

Specialized in Software Development & Problem Solving

Swami Keshwanand Institute of Technology Management And Gramothan

2014

B.Tech in Electronics & Communication
