Dot.Net Projects Overview

Project 1

Project Title : Aim's (ADA Information Management System)
Organization : Aeronautical Development Agency (ADA)
Technology : C#, .Net, Asp.net, SQL 2019, Ado.net, .Net Core, Angular, Web Api
Duration : April-2025 To Nov-2025

Project Description:

The ADA Information Management System is a centralized application designed to store, manage, and track user information efficiently across different modules. It is built to streamline data handling process, improve accessibility, and ensure data integrity across the system.

The application is divided into seven main modules, each of them responsible for a specific function. These modules work together to provide user-friendly system and operational supports and data needs of the organization.

Roles & Responsibilities:

- Responsibilities for the Project
- Part of ADA Information Management System application
- Software development, maintenance, Bug fixes and we are doing some code enhancement.
- Handling of data base activities like stored procedure creation, table creation
- Analyzing, fixing, and validating the issue.
- Used 3 tiers architecture and developed various components which were coded using C#.
- Testing the modules for the required functionalities and bugs.
