OBJECTIVE & PROFILE DETAILS

Seeking a role as an SAP Solution Architect & Engagement Lead in a forward-thinking organization, where I can leverage my expertise in SAP architecture and stakeholder engagement to lead complex transformation initiatives and deliver impactful, value-driven solutions.

- Accomplished SAP Functional Consultant, Solution Architect and Delivery Lead with 16+ years in IT services, delivering excellence across diverse projects and fostering strong client relationships.
- Skilled in a wide range of SAP services, including S4 HANA, SAP ECC 6.0 (SCM, MM,WM,LE,EWM), Rollouts, Application Support, Enhancements, Migration & Upgrades, and successfully managing Mergers & Acquisitions, and Divestiture projects.
- Built versatile operational expertise across retail, FMCG, manufacturing, telecom, and mining industries, adapting to varied business environments and contributing to efficient day-to-day operations.
- Currently serving as an Associate Manager at PDSL UK, with prior experience at leading global organizations including Accenture, ATOS, SAP Labs, and Continental Automotive.
- Successfully managed the delivery of initiatives ranging between \$100,000 to \$250,000, driving efficiency, quality, and stakeholder satisfaction throughout the lifecycle.
- Proven expertise in Request for Proposal (RFP) preparation with a focus on effort and cost estimation for enhancement projects, accumulated over 5+ years.
- Have worked as SAP Solution Architect in the areas of SAP MM, Sourcing and Procurement, Supply Chain Management and Log Ops and Logistic execution for 6 years.
- Deep understanding of business processes in Material Procurement, advanced ATPs, Manufacturing, and Warehouse Management and Extended Warehouse Management.
- Rich experience in EDI integration with 3PL WMS vendors like DHL, Blue yonder, JDA Red prairie.
- Proficient in developing data migration strategies, configuring master data, and ensuring the integrity and accuracy of data flow.
- Expert in working alongside middleware teams using tools like SAP PIPO, iPaaS, Sterling B2B, and MuleSoft for efficient and seamless system integrations.
- Adept at client requirements analysis, functional specifications creation and solution provision.
- Proven expertise in driving change management, providing SME support, and optimising workflows for enhanced operational efficiency
- Experience of E-invoicing integration project.
- Excellent client relationship, Stake Holder Management and communication skills.

PROFESSIONAL EXPERIENCE

PDSL UK

(Jan 2026-Till date)

CLIENT NAME : AGA

AngloGold Ashanti (AGA) is a leading global gold mining company, ranking among the world's largest producers with a diverse portfolio of 21 operations across four continents as of 2023. Headquartered in South Africa, AGA focuses on sustainable mining, utilizing brownfields exploration, and developing new projects to create long-term value, with a significant footprint in Africa, the Americas, and Australia.

Project : **Integration of SAP with Agentic AP Invoicing System.**
Role : **SCM - Associate Manager**
Tenure : **4 Months**

- Spearheaded **presales activities**, delivering **ROM estimates**, leading **business requirement elicitation**, and defining high-level solution architecture
- Orchestrated cross-functional design workshops, aligning stakeholders across business units, AP automation vendor, digital technology, middleware, and SAP teams to finalize end-to-end integration design.
- Directed System Integration Testing (SIT) execution, ensuring end-to-end process validation, defect resolution, and quality assurance across all P2P scenarios.
- Governed cutover planning and execution, including data migration strategy, risk mitigation, and deployment readiness.
- Led Trial Go-Live (TGL) and Business Go-Live (BGL) activities, providing hyper care support, incident management and stabilization to ensure seamless transition to operations.

PDSL UK

(APR 2024-Jul 2025)

CLIENT NAME : GEON PERFORMANCE SOLUTIONS

Geon Performance Solutions is a global leader in formulating and manufacturing specialized polymer compounds, including rigid/flex PVC, PP, TPE, and TPU, headquartered in Westlake, Ohio. With 15 manufacturing plants and ~1,200 employees, they provide custom solutions for demanding industries like medical automotive, and construction.

Project : **Implementation**
Role : **SCM - Associate Manager**
Tenure : **14 months**

- Spearheaded Business Requirement gathering phase of SAP Decentralized WM implementation in two China plants.
- Owned effort estimation and negotiation processes for the complete WM implementation project.
- Engaged in solution design workshops to map current warehouse processes to standard SAP WM processes,
- outline desired improvements to the warehouse operations and business benefits.
- Prepared CSDs and followed through CAB processes to get them approved for implementation.

- Managed and mentored junior consultants team, overseeing the configuration and testing of WM processes as per CSDs, and ensuring exhaustive validation of test evidence to cover all potential scenarios.
- Configured ALE IDoc integration between DWM and ECC systems.
- Ensured successful knowledge transfer to end users, providing clear guidance on SAP transactions and adoption of streamlined warehouse processes.

Accenture Services

(OCT- 2015-Feb 2024)

CLIENT NAME : MONDELEZ International

Mondelez International, Inc., often stylized as Mondelēz, is an American multinational confectionery, food, holding and beverage and snack food company based in Chicago, Illinois. Mondelez has an annual revenue of about \$26 billion and operates in approximately 160 countries.

Project 1 : DIVESTITURE OF GUM BASE PRODUCT AND BUSINESS
Role : Project Manager & SAP Cutover and Test lead
Tenure : 10 months

- Curated list of cutover activities from SAP MM perspective
- Managed successful execution of cutover during system testing, integration testing, user acceptance testing and production cutover.
- Oversaw focused testing processes to capture meaningful insights into current processes across SAP functionalities.
- Directed quality control efforts based on current testing data and insights.
- Demonstrated project management skills to lead and execute divestiture projects.
- Adhered to company policies, maintaining compliance and readiness for audits.
- Curated comprehensive system testing reports following internal standards.
- Coordinated with business owners, client IT team and 3rd party vendors for a smooth transition of business handover at the manufacturing site in Europe.
- Ensured Business-as-usual is unimpacted during the transition by strategizing activities well in advance.
- Worked with vendors from different 3rd party non-SAP tools like Point-X, Cargo-X, Bartender etc.
- Worked on license transfer process of different applications and hardware at the manufacturing plant.
- Coordinated with network security and Plant OT teams for a smooth transition.

Project 2 : EWM Rollout
Role : EWM Consultant
Tenure : 12 months
Region : EU

- Extended warehouse management (EWM/WM) experience: Storage bin, RFID framework, Yard management, Put away and removal strategies, transfer order, post processing framework (PPF).
- Conducted blue printing workshops in the areas of warehouse structure, master data, inbound processing, outbound processing, production supply and third-party interface with DHL.
- Managing the System Integrator and advising the business.
- Actively involved in the development of test scenarios, data migration and cut over activities.
- Being fully engaged with the transition process of the Global template into the SAP COE.
- Worked actively with the Super User community through workshops and presentations to validate the solution and encourage knowledge transfer, skills improvement and process improvement.
- Processes involved – Direct/Indirect Procurement, Contracts Management, Spares Management, Consignment, Subcontracting, Quality Management, Inbound/Outbound/Production supply processing in EWM, Physical Inventory in EWM and integration with third party system- DHL REDPRAIRIE

Project 3 : **Mondelez ADF - Change Requirements**
Role : **SAP MM, Logistics Operation Solution Architect**
Tenure : **16 months**
Region : **APAC and MEU**

- Drove more than 10 SAP Change requirements demands which included below activities in sequence.
- Requirement gathering workshops with client stakeholders.
- Breakdown of Requirements into RICEFW and configuration objects.
- Cost and effort Estimation of RICEFW and config objects using Accenture internal tools.
- Drive effort and price negotiation calls with client stakeholders.
- Prepare High level solution design documentation and walkthrough with business stakeholders.
- Identify right resource allocation for the demand delivery.
- Carry out design workshop with all stakeholders (client, 3rd party WMS vendors)
- Prepare field mapping document (FMD) for integration projects.
- Review Functional and configuration specification document (FS and CSD) prepared by functional consultants on
- Provide SME support to consultants during Build, all testing phases (FUT, SIT, UAT)
- Provide SME support to consultants for defect resolution during testing and through hyper-care phases.
- Drive project transition sessions to AMS team post hyper-care phase closure.

Change requirement handled during solutioning :-

- Develop a custom cockpit for automatic Code to Code(C2C) conversion using 301 movement type also providing approval workflows based on different sales and promotion and stock ATP criteria.

- Develop Source to Pay interfaces related to E-invoicing to integrate with E-invoicing partners like Trade shift, Tungsten, EDICOM.
- Develop a custom cockpit for scrapping requests using 55* movement types.
- EDI Onboarding of new 3PL WMS vendor in Vietnam involving middleware like SAP PIPO and Sterling B2B(EDI888, EDI943, EDI944, EDI, EDI947, EDI846)
- EDI onboarding of procurement vendors
- Integration with Transportation Management System vendor INET

Project 4 : **Mondelez ADF - Change Requirements**
Role : **SAP MM And Log ops Senior Consultant**
Tenure : **21 months**
Region : **North America and Latin America**

Client has multiple sales and distribution centers across NA & LA which are operated by different 3PL Warehouse Management vendors in different locations.

EDI integration of these WMS systems with client's SAP system was necessary for having a synchronization between the two systems for transparency and audit benefits. Client also outsourced Shipment and Transportation and Freight payment processes to OTM vendors – Oracle Transportation management system.

- Responsible for EDI integration of different interface messages like Material master data (888), Purchase orders (943), Goods receipts (944), Goods movement (947), Inventory snapshot (846).
- Drive workshops with middleware teams like SAP PIPO and Sterling B2B for field mapping
- Drive workshops with 3PL WMS partners like Blue Yonder, Red Prairie to understand different fields requirement and mapping them to fields in SAP.
- Responsible for EDI integration of interface messages like STO (943), Delivery (940), Shipment creation, Shipment change, Shipment actuals (204) between ECC and OTM systems.
- Drive Workshops with middleware (PIPO and iPaaS) and OTM teams for field mapping
- Prepare FMD, FS as outcome of above discussions.
- Configure in SAP new output messages to be sent as IDOC to the 3PL systems.
- Prepared test scenarios and test scripts for above integration projects.
- Executed test scripts during FUT, SIT cycles.
- Defect resolution in UAT and Hyper case phases for above integration projects.
- Worked on proxy interfaces with Omprompt system for Stock transport order creation and third-party order creation processes.
- Maintained Knowledge repositories, functional specification documents and test strategy documents for the new enhancements.
- Worked on multiple custom report creation for master data and inventory snapshot interfaces.
- Proposed automation using RPAs for optimization of the process for repetitive demands.

Project 5 : **Mondelez ADF - SAP UPGRADE**
Role : **SAP MM And Log ops Senior Consultant**
Tenure : **5 months**
Region : **MEU**

- Executed regression test scripts in parallel to UAT test phases during SAP ECC Upgrade
- Executed SAP WM test scripts during SIT and UAT phases to ensure there will not be any impact on the BAU post Go-Live
- Actively recorded defects in HP ALM during test phases for tracking
- Resolved defects during test phases and retest impacted test scripts. Retest impacted test scripts.

CLIENT NAME: HEXION INDIA

(MARCH 2017 – JAN 2018)

Hexion Inc. or Hexion is a chemical company based in Columbus, Ohio. It produces thermoset resins and related technologies and specialty products. Hexion is organized into two divisions: the Epoxy, Phenolic and Coating Resins Division, and the Forest Products Division

Client Name : Hexion India
Role : Senior SAP MM Consultant

- Worked on SAP Upgradation projects, Scripts provided for demos and the tickets logged on the Process flows
- Have taken responsibility of a P2P lead in implementing a plant for Hexion in India
