

Dhiraj Malshikare

SOFTWARE ENGINEER

| LinkedIn - <https://tinyurl.com/y4scf7vb>

Summary: Dedicated and skilled Developer with 3.6 years of professional experience in **JavaScript, C#, .Net Core and ReactJS**. Passionate about leveraging technology to develop innovative solutions that meet business needs. Seeking a challenging role where I can contribute my expertise to drive projects to success.

EDUCATION: SVPM's College of Engineering, Malegaon BK B.E., Electronics and Communications Engineering 2017-2021

- **SKILLS:** JavaScript, C# .NET Core, ASP.Net MVC, SQL, HTML & CSS, ReactJS
- **Tools:** GitHub, Windows, Azure DevOps, Terraform, CI/CD
- **Technologies :** CSS, HTML, SQL
- **Languages:** Marathi, English, Hindi

Achievements

- Star Performer Award
- Delivery Excellence Award
- Proud Partner Award
- The Code Master Award

Total Exp : 3.6 YEARS

Experience: Capgemini Technologies, Pune, India (DOJ – 19th Oct 2021)

BACK-END: C# .NET Core, ASP.NET MVC, Web API, AJAX, JavaScript

FRONT-END: HTML, CSS, ReactJS, Bootstrap

Cloud: Azure DevOps, Jenkins, NewRelic, Docker, Kubernetes, Terraform

- Successfully completed the client development tickets and enhancements in applications within a deadline.
- Developed and maintained web applications using .NET Core and ReactJS.
- Translated business requirements into technical requirements to ensure software solutions meet client needs.
- Created device management portal using JavaScript, HTML, CSS with ReactJS and Bootstrap.
- Worked closely with Clients and Architects to develop and resolve production issue and enhance the backup functionalities in case of failures.
- Managed the full software development lifecycle, from requirement analysis to deployment, using Agile methodologies.
- Implemented CI/CD pipelines using Azure DevOps, resulting in streamlined deployment processes and reduced manual intervention.
- Innovated the tool to get the status of all the remote desktops without RDP to the device manually
- Dynamically works on different projects and shared the bandwidth within Support and development team
- Conducted regular code reviews and enforced coding standards to improve code quality.

1. MetLife – Cloud-Based Application Development

Duration: Nov 2021 to March 2023

Technologies Used: **C# .NET Core, React, REST API, Azure DevOps, WPF**

- Key Responsibilities: Developed robust cloud-based solutions, implemented REST APIs for seamless data exchange, and utilized Azure DevOps for CI/CD pipeline management. Enhanced user interfaces using WPF and optimized performance through effective debugging and code review.

2. McDonald's – Web & Windows Application Development

Duration: March 2023 to May 2025

Technologies Used: **C# .NET Core, React, Azure DevOps, WPF, MECM, PowerShell, CI/CD, JIRA, NewRelic**

- Key Responsibilities: Led the development of web and desktop applications, integrating MECM for software deployment and maintenance. Automated routine tasks with PowerShell, implemented CI/CD pipelines, and monitored application performance using NewRelic. Collaborated with cross-functional teams for feature enhancements and issue resolution.

Licenses & Certifications

- AZ-900: Azure Fundamentals
- AZ-104: Azure Administrator Associate
- AZ-400: Designing and Implementing Microsoft DevOps Solutions
- AZ-500: Azure Security Engineer Associate
