## EXPERIENCE

---

### AUXWEB IT SOLUTIONS

Calicut, India

*Software Development Engineer*

*July 2024 - Oct 2025*

- Built and managed product modules and sub-systems, contributing to the enhanced product functionality and usability.
- Collaborated with product and engineering teams to ensure the accuracy and integrity of computations and calculations, directly contributing to successful project delivery and alignment with business requirements.
- Deployed and maintained applications across multiple platforms, ensuring consistent performance and user engagement.
- Conducted code reviews and provided mentorship to junior developers, establishing best practices and fostering a culture of continuous improvement within the development team.
- Was responsible for the development of a project and team management application using Flutter and Node js backend.

### VORPS TECHNOLOGIES

Delhi, India

*Flutter Developer*

*Oct 2022 - July 2024*

- Solely developed Bonzo from concept to launch: Independently handled end-to-end architecture, coding, applying the smooth UI/UX animations, and deployment on both Android and iOS platforms.
- Led a team in developing a cross-platform mobile application using Flutter framework, resulting in a 30% improvement in project development speed through the incorporation of Agile development methodologies.
- Conducted performance testing, resolving 95% of reported bugs for improved stability through unit testing practices.
- Provided a complex socket server integration that retrieved and displayed real-time data, enhancing the versatile functionality of the application and contributing a major reduction in data latency.
- Established data synchronization processes for optimal data flow within applications, ensuring reliability and performance.
- Engineered the application UI, built boiler-plate codes and created 30+ custom widgets, resulting in a 40% reduction in development time for new features; enhanced user experience and smoother, more responsive interfaces.

## TECH STACK & TOOLS

---

- **Technical Skills:** Flutter, Dart, Java, Firebase, RESTful APIs, Git, CI/CD, SQLite, Hive, MongoDB, Socket Server, Android SDK, AWS, Testing and Deploying, Postman, Figma, Javascript, HTML/CSS
- **Architecture & Patterns:** BLoC, Riverpod, GetX, MVC, MVVM, TDD, Clean Architecture, SDLC

## PROJECTS

---

**Whywe [android ios](#)** - An app to discover and redeem local deals across 50+ categories with QR-code coupon redemption.

- Utilized best programming practices such as lazy loading, caching, pagination, extensive testing reducing the app load time.

**Bonzo [android](#)** - Online multiplayer gambling gaming mobile application. Spearheaded UI/UX design and development for Bonzo, incorporating RESTful APIs, socket server(socket.io) and third-party plugins that boosted average session time.

- Integrated third-party payment gateways for payment and payout systems, resulting in a 30% increase in successful transactions and an increase in app revenue.
- Effectively added Google ads and daily streak rewards, notification, which resulted in enhancement in user engagement.

**Atma Jyoti [android ios](#)** - A spiritual mobile application facilitating fundraising and online pooja bookings, leveraging Android SDK and third-party payment gateways to ensure secure transactions.

- Implemented localization, leading to an increase of app downloads and improved accessibility for monolingual users.
- Redesigned UI components, increasing user retention by 15% through improved interactivity and visual aesthetics.

**Radiosesel [android](#)** - A custom Android radio app featuring an admin dashboard that streams audio data from Radiosesel.com, boosting user engagement and fueling growth within Seychelles Radio community.

- Engineered seamless integration between the admin panel and mobile app's Firebase backend, enabling real-time content synchronization and ad management, which led to the client's satisfaction rating of 4.5/5.

**Jay-Walk [android ios](#)** - Collaborated with a diverse team of technologists(Tech For Palestine) and peace builders for a secure platform designed to help activists and allies organize, mobilize, and resist suppression.

## EDUCATION

---

### BROTOTYPE

*Flutter Developer Trainee*

Kochi, India

*Jan 2022 - Aug 2022*

### KANNUR UNIVERSITY

*BA in History*

Govt. Brennen College, Thalassery

*2015 - 2018*
