Chennai/TamilNadu

---

### SUMMARY

I am a Full Stack Developer with strong expertise in **React Native** mobile app development and **Node.js** backend systems. Skilled in crafting high-quality, scalable Android applications using Redux, Firebase, REST APIs, and secure authentication methods. Adept at integrating front-end and back-end systems with clean architecture and efficient state management.

### EXPERIENCE

**FIRST GEN ECOM INDIA PVT LTD**

**SEP 2023**

#### Developer

- Developed and maintained mobile applications using **React Native** for Android platforms.
- Implemented Redux for state management, ensuring efficient data flow across the app.
- Integrated RESTful APIs to fetch and display data, enhancing the app's functionality.
- Utilized JWT (JSON Web Tokens) for secure authentication and authorization in user login and registration processes.
- Worked with **Node.js** on the backend to manage server-side logic, connect to databases, and handle API requests.
- Wrote clean, maintainable code while following best practices for scalability and performance.
- Debugged and resolved issues reported by users to improve app stability and functionality.

#### Key Projects

- **Vendor App:** A React Native app designed to manage vendor activities, including order management and performance tracking.
- **Delivery Boy App:** Features real-time tracking, efficient state management (Redux), and user-friendly design.
- **UserApp:** Seamless order placement and tracking experience with real-time delivery updates, push notifications and ui Optimized performance.

## React Native Developer (Remote - 10 Months)

- **Rider Delivery App:** A real-time tracking and management solution for delivery personal.
- **Rider User App:** A React Native app designed to manage Rider Booking activities, including performance tracking.
- **RiderAdminPannal:** Designed for managing bookings, tracking rider activity, and overseeing system performance.

**BOT 2 DO TECHNOLOGIES PVT LTD**

**JAN 2021 – MAR 2022**

### FrontEnd Developer

- Developed full-stack websites using JavaScript, HTML, CSS, React.js, Next.js and Node.js
- Enhanced user experience by creating intuitive navigation and responsive designs.
- Designed and maintained corporate and client websites, delivering high-quality, scalable solutions.
- Contributed to **AnySkool:** A SaaS-based app for school administration, e-learning, and parent-teacher communication.
- Developed **StackByteApp:** A platform helping college students transition to professional careers with responsive design and smooth navigation.

### Freelance React Native Developer

- **Rider Delivery App:** A real-time tracking and management solution for e-commerce delivery personnel.
- **Rider User App:** A React Native app designed to manage vendor activities, including order management and performance tracking.
- **XDR Technologies Website:** A full-stack e-commerce platform developed using React and Node.js, featuring secure payment integration and seamless user experiences. [Link](#)

### SKILLS

- **Mobile App Development:** Cross-platform app development using React Native, Redux for state management, and integration of third-party libraries.
- **Backend Development:** Node.js, Express.js, RESTful API development and integration, JWT for authentication, and database design.
- **Frontend Development:** Responsive UI/UX design with React.js, HTML, CSS, and Tailwind CSS.
- **Database Management:** Firestore, MongoDB, SQL.

### EDUCATION

#### Bachelor of Engineering - Mechatronics

Aarupadai Veedu Institute of Technology ,Paiyanur,Mamallapuram

**2016-2020**

#### Higher Secondary Certificate (HSC)

Alagappa Schools, Chennai

**2015-2016**
