EXECUTIVE SUMMARY

AI-first product and architecture leader with **25 years of experience** designing and scaling **AI-native, outcome-driven platforms**, with deep roots in **education technology**. My work in learning systems began early in my career as a **co-founder of WEUME (2000)**, where we envisioned and built *wonderschools.com*—one of India's early platforms to digitally connect schools and their stakeholders.

Through *wonderschools.com*, I helped design end-to-end **student information systems (SIS), learning management systems (LMS), school websites, collaboration modules, and emergency response systems**, laying a strong foundation in how technology can structurally improve learning delivery, communication, and outcomes. This early exposure shaped my long-term focus on building systems that **support learning, adapting to users, and improving outcomes through feedback and data**.

Since then, I have served as a CTO and founder with full ownership of **architecture, generative AI strategy, and execution** for multiple revenue-generating platforms. Today, my work centers on treating **AI as the operating system**, replacing manual effort with intelligent, self-improving systems that accelerate human learning and performance at scale.

CORE VALUE

- **CTO-Level Product Ownership:** Architecture, AI strategy, and delivery end-to-end
- **AI as Operating System:** LLMs, autonomous agents, workflow automation

- **Outcome-Driven Design:** Feedback loops, personalization, performance optimization
- **Cloud-Native Scale:** AWS-centric, multi-tenant SaaS, cost-efficient systems

PROFESSIONAL EXPERIENCE (SELECTED)

Founder & CEO — Work Of Wisdom AI (WOW AI) | 2025–Present

Architecting an **AI-native platform** embedding generative AI and autonomous agents into products to automate decisions, reduce cognitive load, and create **self-improving systems**.

CTO — Moving Walls Pte Ltd | 2023–2024

CTO for core products; designed **self-serve platform (75% dev effort reduction)**, multi-tenant CMS, and high-performance bid engine. Led AI/ML and AWS optimization initiatives.

CTO — qBotica Inc. | 2021–2023

Owned architecture and delivery of AI-enabled automation platforms; led post-acquisition re-architecture and large-scale customer deployments.

Co-Founder & CEO — Qruize Inc. | 2012–2023

Built and exited multiple products; achieved **\$1M+ annual revenue** with sustained profitability.

Co-Founder — WEUME | 2000–2002

Co-founded an early **education technology company** and built *wonderschools.com*, an end-to-end platform connecting schools and stakeholders through SIS, LMS, collaboration, and emergency response systems.

TECHNICAL EXPERTISE

- **Generative AI:** OpenAI GPT-4/3/2, LLM-based agents, autonomous systems

- **Architecture:** Microservices, Event-Driven, SOA, Autonomous Agents
- **Cloud:** AWS (primary), Azure, GCP | Docker, Kubernetes
- **Languages:** Java, Python, C (Linux)

EDUCATION & RECOGNITION

M.Tech, Information Technology — Allahabad Agricultural Institute

Ulitzer: **2nd Most Influential Cloud Blogger Worldwide (2009)**
